

BUG REPORT: Unsubscribed User Data Privacy Breach & UI Control Defect

System: SheGuidesMe Web Application | Report ID: BUG-UNSUB-2026-001

Issue Type	Bug / Privacy Violation & Missing Call-to-Action	Severity	HIGH
Environment	Production Web App	URL	https://sheguidesme.com/profile/me
Reporter	QA Automation & Testing Team	Status	OPEN

1. Executive Summary

During test execution for unsubscribed user permissions, multiple critical defects were identified. Unsubscribed users are currently capable of viewing sensitive personal information (Location, Phone, Email, Qualifications) and accessing protected action buttons ("Certificate" and "Bio Data"). Furthermore, key monetisation entry points such as the **"Upgrade" button** and **"Upgrade Now" card** are completely missing or replaced with erroneous options ("Cancel Membership" and profile completion prompts).

2. Test Suite Execution Results Summary

TC ID	Test Description	Expected Result	Actual Result	Status
UNSUB-01	Verify unsubscribed user cannot view full details	Details should be blurred or hidden for unsubscribed users	Full details (Phone, Email, Location, Qualification) are completely visible	FAIL
UNSUB-02	Verify Upgrade button is displayed for unsubscribed users	Upgrade button should be displayed in user menu	"Upgrade" button absent; "Cancel Membership" & "Complete profile" shown instead	FAIL
UNSUB-03	Verify clicking Upgrade button redirects to subscription page	User redirected to upgrade membership page	Cannot test / Failed due to missing Upgrade button in menu	FAIL
UNSUB-04	Verify unsubscribed user cannot access certificate and Bio Data	Clicking Bio Data or Certificate should redirect to upgrade page	"Certificate" and "Bio Data" buttons are directly accessible on profile	FAIL
UNSUB-05	Verify Upgrade Now card is displayed to the users	Upgrade Now card should be displayed on profile panel	Displays profile progress card (72%) instead of Upgrade card	FAIL

3. Steps to Reproduce

1. Log in as an unsubscribed/free user tier account on <https://sheguidesme.com>.
2. Navigate to any user profile page (e.g., /profile/me).
3. Inspect personal information fields under the user profile header.
4. Observe the "Specific Training Certificate & Experiences" section for "Certificate" and "Bio Data" buttons.
5. Click on the top-right profile avatar/dropdown navigation menu.

4. Evidence Screenshots

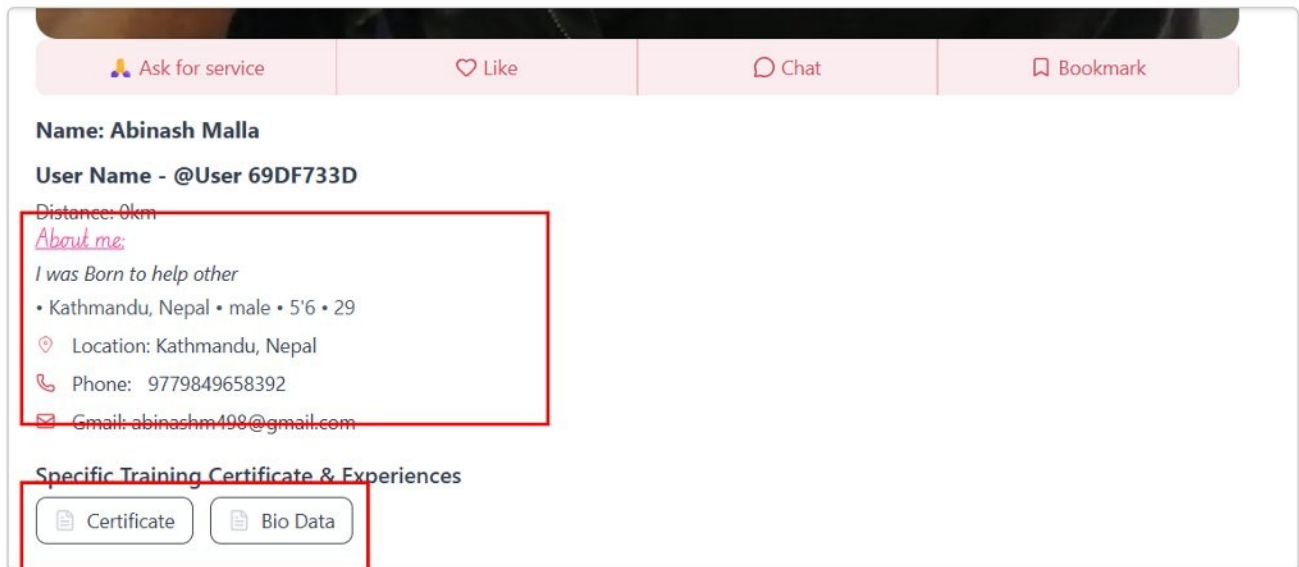

Figure 1: Highlighted privacy violation showing exposed Phone, Email, and interactive Certificate/Bio Data buttons.

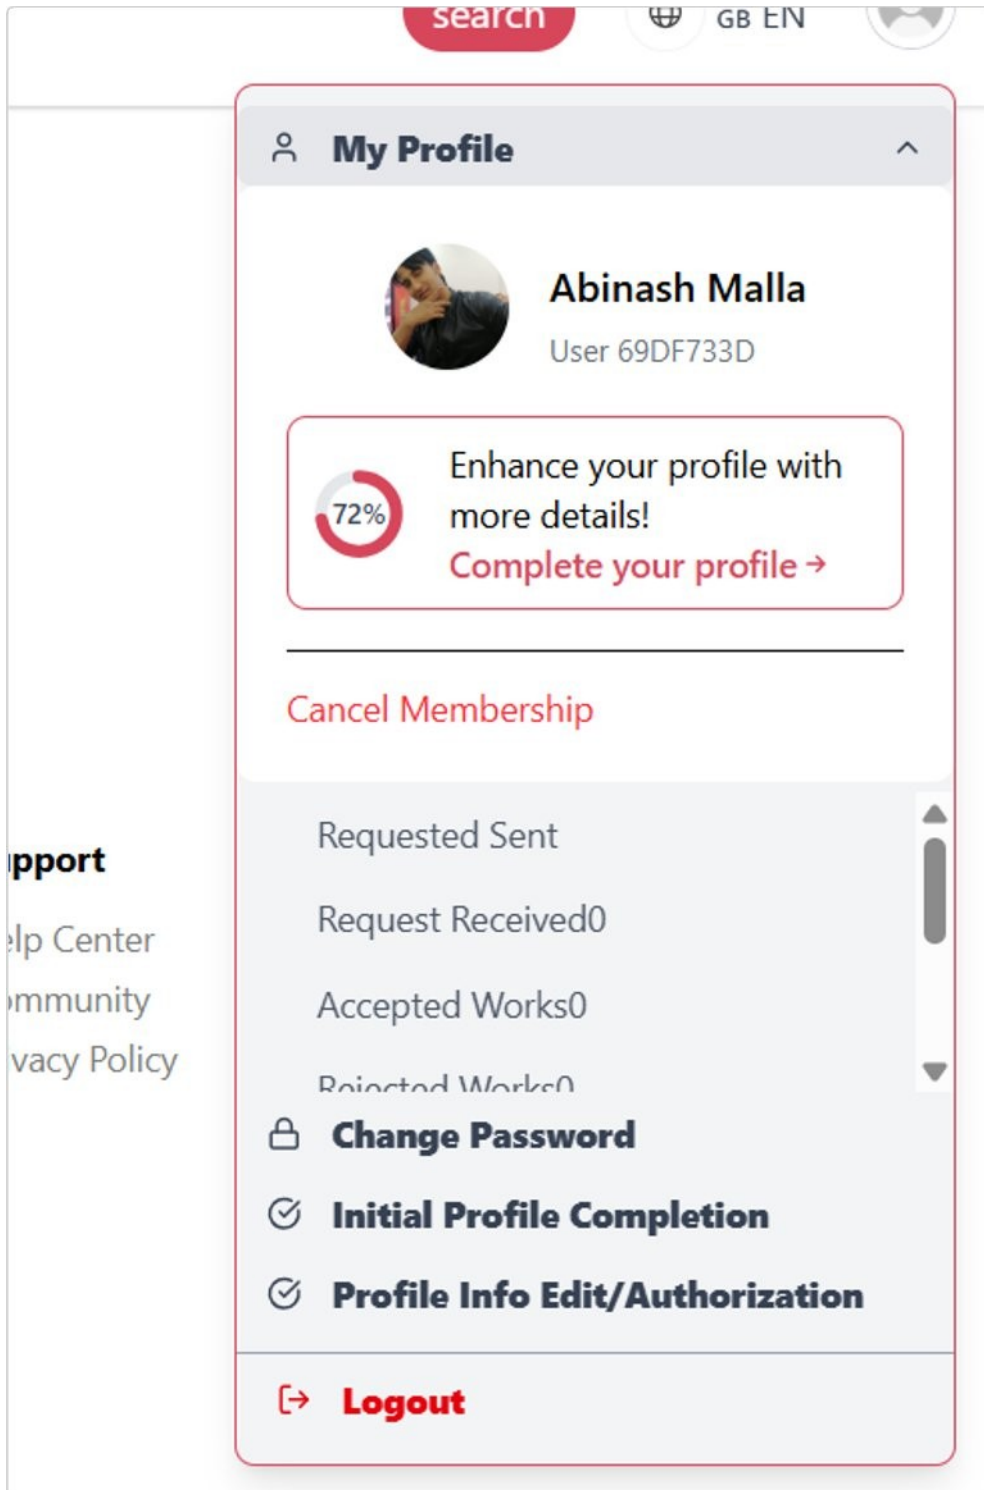

Figure 2: Highlighted dropdown defect showing "Cancel Membership" and profile progress card instead of "Upgrade".

5. Impact & Recommendations

- **Data Privacy Impact:** High severity GDPR/Privacy risk. Personal phone numbers and email addresses are exposed without active subscription verification.
- **Business Impact:** Loss of conversion/revenue opportunities since unsubscribed users are presented with a "Cancel Membership" option instead of clear "Upgrade to Premium" prompts.
- **Remediation:** 1. Implement backend authorization check and blur component for sensitive user details.
2. Correct conditional rendering logic in top nav dropdown to display "Upgrade" button for unsubscribed status.
3. Ensure "Certificate" and "Bio Data" triggers open the Subscription Modal when clicked by free users.
