

TEST CLOSURE REPORT

Project Name: SheGuideMe Web Platform

Application URL: <https://sheguidesme.com/>

Document Version: 1.0

Prepared By: QA Lead / Quality Assurance Team

Date: September 24, 2026

Status: Completed & Ready for Release

1. Executive Summary

This Test Closure Report synthesizes the testing activities, results, metrics, and risk assessment for the **SheGuideMe** web platform release. Testing spanned across **Functional, UI/UX, Cross-Browser/Responsive, Security, and Integration Testing** (Payment Gateway & Notification Systems).

Overall, the system met all key quality metrics with a **95%+ Test Execution Pass Rate** and **0 Critical/Blocker open bugs**. The platform is **RECOMMENDED FOR PRODUCTION DEPLOYMENT**.

2. Scope of Testing

2.1 In-Scope

- **User Authentication & Profiles:** Traveler registration/login, Guide registration & onboarding verification workflow.
- **Guide Discovery & Search:** Location-based filtering, activity tags (e.g., food tours, historic walks).
- **Booking Engine & Cart:** Booking slot selection, guide availability check, checkout process.
- **In-App Communication:** Traveler-to-guide messaging and real-time notification alerts.
- **Payment Gateway Integration:** Secure payment handling and booking receipt generation.
- **Ratings & Reviews:** Post-trip review submission and guide score aggregation.
- **Cross-Browser & Responsiveness:** Chrome, Firefox, Safari, Edge, and mobile web browsers (iOS & Android).

2.2 Out-of-Scope

- Native iOS / Android Mobile App testing (covered in separate mobile release cycle).
- Load/Stress testing beyond 10,000 concurrent active users.

3. Test Execution Summary & Metrics

3.1 Overall Execution Summary

Metric	Target	Actual	Status
Total Test Cases Planned	120	120	100% Executed
Test Cases Passed	≥	115	95.8% Pass
Test Cases Failed	-	5	4.2% Fail
Test Cases Blocked / Skipped	0	0	0%

3.2 Feature-Wise Test Results

Feature Module	Executed	Passed	Failed	Pass Rate
Auth & Profiles	20	20	0	100.0%
Guide Search & Filters	25	24	1	96.0%
Booking System	30	29	1	96.7%
Payments & Checkout	20	19	1	95.0%
Messaging & Notifications	15	14	1	93.3%
Reviews & Feedback	10	9	1	90.0%
Total	120	115	5	95.8%

4. Defect Summary & Quality Analysis

4.1 Defect Distribution by Severity

Severity Level	Total Reported	Resolved / Closed	Open	Resolution Rate
Blocker / Critical (S1)	4	4	0	100%
High (S2)	12	12	0	100%
Medium (S3)	18	15	3	83.3%
Low / Cosmetic (S4)	10	8	2	80.0%
Total Defects	44	39	5	88.6%

4.2 List of Open Unresolved Defects (Medium/Low)

Defect ID	Summary	Severity	Workaround / Mitigation
BUG-031	Minor layout shift on search filter when viewed on iPad Mini Safari.	Low	Page remains functional; fix scheduled for patch v1.0.1.
BUG-037	Notification sound delays by 2 seconds on web chat during slow connections.	Medium	Visual notification banner functions normally.
BUG-040	Guide rating average rounds up incorrectly to 2 decimal places in edge cases.	Medium	Purely cosmetic display issue on profile page.
BUG-042	Search dropdown takes > seconds under 3G throttled network.	Medium	API query optimization planned in Sprint 2.

BUG-044	Profile bio character counter doesn't update until blur event.	Low	Text limit enforced server-side.
----------------	--	-----	----------------------------------

5. Test Environment Details

- **Staging Server:** <https://staging.sheguidesme.com>
- **Browsers Tested:** Chrome v128+, Firefox v129+, Safari v17+, MS Edge v128+
- **Devices Tested:** MacBook Pro (14"), Dell XPS 15, iPhone 14/15 Pro (Safari), Samsung Galaxy S23/S24 (Chrome), iPad Air (Safari)
- **Test Automation Tools:** Selenium WebDriver / Cypress (E2E), Postman (API Integration), JMeter (Basic Performance)

6. Exit Criteria Evaluation

Exit Criteria	Standard Target	Achieved Status	Status
100% Executed Planned Test Cases	100%	100%	PASSED
Critical / Blocker Bugs Open	0	0	PASSED
High Severity Bugs Open	0	0	PASSED
Test Case Pass Rate	≥	95.8%	PASSED
Sign-off from QA Lead & Product	Required	Obtained	PASSED

7. Lessons Learned & Recommendations

7.1 Key Lessons

1. **Third-Party Payment Gateways:** Sandbox test responses occasionally caused timeout edge cases. Mock API endpoints helped isolate application-side bugs faster.
2. **Localization & Timezone Adjustments:** Initial issues found in booking slots were tied to timezone conversions between traveler local time and guide local time.

7.2 Recommendations for Future Sprints

- Expand automated regression suite for core flows (Search → Booking → Payment).
- Introduce dedicated load testing for peak holiday booking windows.

8. Final QA Sign-Off & Approval

- **QA Lead:** Approved ☒
- **Product Manager:** Approved ☒
- **Engineering Lead:** Approved ☒

Final Recommendation: APPROVED FOR DEPLOYMENT to Production
(<https://sheguidesme.com/>).
